

**COE-INES Workshop on
TITech-SNU Research Collaboration
on Innovative Nuclear Energy Systems**

AGENDA

Date: Friday, 6 August, 2004

Place: TITech, RLNR Conference Room #1

10:00-10:30 Opening Remarks and Introduction of COE-INES (H. Sekimoto)

10:30-11:00 Overview for NUTRECK R&D (Il Soon Hwang)

11:00-11:30 Pb-Bi Coolant Research Activities in TITech (T. Obara)

11:30-12:00 PEACER 3D Visualization (Hyong Won Lee)

12:00-13:00 (lunch)

13:00-13:20 Status of Pb-Bi Loop (HELLIOS) Development and R&D Plan (Seungho Jeong)

13:20-13:40 Understanding of Oxide Film Nature for Corrosion Control in Pb-Bi (Chi Bum Bahn)

13:40-14:00 HELLIOS 3D Visualization (Seung Hee Chang)

14:00-14:20 I&C Vision for HELLIOS (Na Young Lee)

14:20-14:40 Po Experiments (T. Miura)

14:40-15:00 (break)

15:00-15:20 Time-dependent Problems of Subcritical Nuclear Systems (K. Iwanaga)

15:20-15:50 General Introduction to CANDLE Burnup (H. Sekimoto)

15:50-16:10 CANDLE Burnup Applied to HTGR (Y. Ohoka)

16:10-16:30 Discussions for Future Collaborations

Number of participants:

9 from Seoul National University

16 from Tokyo Institute of Technology

Contact person: Prof. H. Sekimoto (hsekimot@nr.titech.ac.jp)
